Experience

Fall 2014 > Present
Staybridge Suites > Hotel Night Auditor
> Nightly revenue reconciliation of room revenue, movie revenue and all other revenue sources.
> Reconcile hotel bank deposits to what was recorded in property management system.

Projects

github.com/vietanhh/fitness-strong
Fitness Strong
> Simplistic fitness application that generates daily workouts filtered by body parts and contains how-to videos for over 5000 exercises. Built using jQuery UI Plugins to enhance user experiences.

github.com/vietanhh/PhreshFood
PhreshFood
> Innovative food ordering application that utilizes QR Code technology to enable "collaborative ordering" between multiple users.

github.com/vietanhh/planner-assist
Day Planner Assistant
> Implemented sophisticated SQL database storage algorithms to enable push notifications for alerting daily personal tasks.

github.com/vietanhh/SafeDrive
SafeDrive > Hack Princeton Fall 2016
> Bluetooth speaker on steroids with lots of functionality built-in and the ability to swap from an Alexa-only device to a quick and easy way to interact with your phone without touching it.

Hackathons

1st Place Overall
FoodAi > LehighHacks Fall 2016
> Mobile application built using machine learning along with image recognition in scanning any household fridges to produce a combination of possible easy to follow recipes.

Semester.ly > Best Value Proposition for Students
AlexaUX > HopHacks Fall 2016
> Web creation tool with over 1000 customizable components using voice recognition.
> Lead and taught a team of 4 members in using lambda functions in conjunction with Amazon echo to build dynamic web components.

Most Commercially Ready
Wrinkle > AWS + Intel Hackathon (NYC)
> An app that remind you to take your meds, communicate with your doctor by asking refills, and it also allows the doctor to send a real time audio reminder messenger.

Best Device Privacy Hack
FrSecurity > HackHolyoke IV Fall 2016
> Burglar-proof security application that detects unauthorized entries by implementing face recognition using a surveillance system, Clarafai, and Amazon Alexa.

Honorable Mention
Baymax 2.0 > HackNJIT Fall 2016
> Provides a friendly AI for all types of medical question with lightning fast responses on symptoms, alternative prices for medication, and locations of pharmacies and clinics for you usage.
